

Vishnu K

Kallakurichi, Tamil Nadu

Phone: +91 8610904342 — **Email:** karthikvishnu7077@gmail.com

LinkedIn: linkedin.com/in/vishnu-data-scientist3 — **GitHub:** github.com/Vishnu-77-cpu

Professional Summary

Detail-oriented Data Science and IT professional with a solid foundation in Python programming, Exploratory Data Analysis (EDA), and machine learning model development. Experienced in end-to-end project workflows including data preprocessing, visualization, model building, and evaluation. Eager to add value to an organization through analytical thinking, problem-solving, and continuous learning.

Education

Bachelor of Science in Software Computer Science 2022 – 2025

Shanmuga Industries Arts and Science College, Tiruvannamalai

Percentage: 70.5%

Senior Secondary Education (CBSE) 2021 – 2022

Sri Ramana Public Senior Secondary School

Percentage: 61.8%

Technical Skills

- **Languages:** Python, SQL
- **Data Science:** Data Cleaning, EDA, Feature Engineering, Machine Learning
- **ML Models:** Logistic Regression, Decision Tree, Random Forest, XGBoost, K-Means Clustering
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Tools:** Jupyter Notebook, Google Colab, Git & GitHub, MySQL, Power BI, LaTeX
- **Cloud & AI:** Google Cloud, Generative AI
- **Strengths:** Logical Thinking, Problem Solving, Debugging

Experience

Data Science Intern 2026

Rubix AI Solution, Bangalore

Sponsored by DataMites (Project-Based Internship)

- Worked on real-world data science projects provided as part of industry-sponsored internship training.
- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and feature engineering.
- Built and evaluated machine learning models for classification and clustering use cases.
- Gained hands-on experience with Python, Pandas, NumPy, Scikit-learn, and data visualization techniques.
- Followed end-to-end machine learning workflow from data understanding to model evaluation.

Projects

Bank Marketing Term Deposit Prediction — Machine Learning

[GitHub](#)

- Built predictive models on the Portuguese Bank Marketing dataset to identify customers likely to subscribe to term deposits.
- Performed data cleaning, preprocessing, EDA, feature engineering, and handled class imbalance.
- Trained and evaluated Logistic Regression, Decision Tree, Random Forest, and XGBoost using accuracy, precision, recall, and F1-score.

FIFA 20 Player Performance Analysis — Data Science

[GitHub](#)

- Analyzed FIFA 20 player attributes (pace, shooting, passing, dribbling, defending, physicality) using Python.
- Conducted data preprocessing, EDA, and applied PCA for dimensionality reduction and visualization.
- Used K-Means, Hierarchical Clustering, and DBSCAN to cluster players and extract skill-based football insights.

Handwriting Prediction — Machine Learning

[GitHub](#)

- Developed a handwriting prediction model to recognize digits using image data.
- Performed image preprocessing including grayscale conversion, normalization, and reshaping.
- Trained classification models and evaluated performance on the MNIST dataset using accuracy and confusion matrix.
- Implemented full workflow covering data loading, preprocessing, training, testing, and prediction.

Achievements & Extracurricular Activities

- Active participant in sports events including Cricket & Badminton
- Collector of old and foreign coins & currencies
- Strong interest in logical games and puzzle-solving

Certifications

- Data Science Course – DataMites, Bangalore
- Deloitte Data Analytics Job Simulation – Forage
- Tata – GenAI Powered Data Analytics
- Google Cloud Computing Foundations
- Generative AI Fundamentals
- NASSCOM – Data Science / AI Certification
